

Winston Pidor

Ability Summary

- Experience in Java EE, Struts 1 & 2, Spring/Springboot, Hibernate, HTML, CSS, Javascript(Jquery, Ext Js), Apache Cordova, Oracle, SQLite, JavaSE(GUI/SWING), Web service(Axis2) and SOA BPEL.
- Over seventeen years experience as Java developer
- Over ten years of experience with Server Side Java Development
- Five years of experience with Front End/GUI Development
- Over ten years of experience with J2EE, Struts 1, JSP, Servlets, Oracle, SQL
- Five years of experience with Spring Framework and spring rest
- 1.5 years of experience with Springboot and Spring web services
- Three years of experience with Hibernate, HTML 5, Node.js and Apache Cordova
- One year experience with Bootstrap
- Seven years of experience with Web Services (SOAP and REST)
- Has experience with tools like Eclipse, Visual Studio Code, SVN, CVS, GIT, ANT and maven
- Exposure to Angular+MaterialsUI+Bootstrap, React+Bootstrap or MaterialsUI, Docker and AWS

Employment History

Java Application Developer

04/2019 - 03/2020

FedEx/Cooksys

60 Fedex Pkwy, Collierville, TN

Responsibilities:

- Design and develop Forms Ordering System. A web application where users order printed forms, tags, labels, etc. Uses Spring, Spring rest, Spring jdbc template, Jxl, Html, Javascript and Bootstrap. Also, Modified 2 old systems(AODForms and TIS) that have dependencies with Forms ordering system for handling order approval and pick up. It uses Spring Boot, Spring rest, Spring @Scheduled(for email notifier), HTML, Bootstrap, Javascript(JQuery), Servlets, Jdbc, JXL and Velocity.
- Modify Load Plan project. Used for managing the loads of an airplane. Uses Spring WS and Spring jdbc template. Modify Aircraft Damage project. It is used for reporting damage to aircraft and for investigation on who is responsible for the damage. It uses Node.js, Springboot, Springrest, JPA, Hibernate and FreeMarker.
- Modify Feedback web application to generate excel report. It uses Jxl, Servlets, Velocity and JDBC.

Technologies used: Spring Boot, Spring, Servlets, JSP, Velocity, FreeMarker, HTML, Bootstrap, Maven, Node.js, Javascript (jQuery and Bootstrap), JPA, Hibernate, JDBC, Spring Jdbc template, Velocity, JXL, Weblogic server, Git, SVN, and CVS.

ENTERPRISE WIDE PROGRAMMER/ANALYST 3

09/2014 - 08/2018

VERIFONE GLOBAL
DEVELOPMENT CENTER

Pasig City, Philippines

Responsibilities:

- Working remotely with our Manager in Atlanta, Georgia and IT Business.
- Maintain, design and develop a large J2EE application named Broadvision web application. Used Broadvision api, HTML, CSS, Javascript(JQuery, JQuery Mobile), JSP, JSTL, Struts 1, JDBC and Apache Cordova(Mobile Application).
- Assist in developing and fixing security vulnerability on all Broadvision web applications.
- Design and develop mobile applications single handedly. Used Apache Cordova, HTML5, CSS, Javascript(JQuery mobile) and SQLite. This is used by technicians to update cases for repair in the USA, Portugal and South Africa. This will also give the technicians location when updating records. It is capable of offline work so that the data will sync later when internet connection is available. Uses a camera as a barcode scanner. It is also able to capture signatures and upload files.
- Maintain, design and develop Integrations systems like SOA BPEL modules and web services using Axis2+EJB or Spring(MVC/Rest)+JDBC template.
- Used SVN as version control system
- Participate in discussions with Business Analyst and or with other teams with different systems like Amdocs and Oracle team
- Provide test plans. Perform Unit testing and regression testing on the application
- Provide deployment plan
- Provide support during and after deployment or in case there's issue during deployment
- Research JCraft(JSch) and develop standalone applications that can connect to other secured machines for file transfer.
- 24/7 Technical Support
- Assist external developers during development since they need to debug applications in Broadvision portals. Provide users for them to use in their test plans. Assist on their deployment plans
- Assist newly hired senior developers
- Create and update JIRA when there's new project or bug or issue
- Prepare SVN branches for new project or bug or issue

Technologies used: Broadvision API, Struts 1, Spring(MVC/Restful), Spring JDBC Template, SOA BPEL, Web Service (Axis2), EJB, JSch, Oracle - JDBC & Stored procedure, HTML, CSS, Javascript - JQuery, Weblogic server, Apache Cordova - Android Tools: Apache Ant, Apache Maven, SVN, Eclipse, Toad, Unix/Windows 10

Senior Web Developer

02/2014 - 08/2014

ITPPL/JACM SERVICES
INC/Advisen

Davao City, Philippines

Responsibilities:

- Design, develop and maintain Advisen web applications(<https://www.advisen.com>) like Federal Dockets, Mscad, Loss Triangle, People(Beta) Expansion, Program Management 2, Easy Placement, Fpn, Advisen Community and Advanced Policy Comparison. Used HTML, CSS, Javascript(JQuery, Prototype.js), jsp, jstl, struts 1 and jdbc.
- Participate in discussions with our project lead(senior developer) and project manager
- Worked as team lead with 3 junior java developers and 2 other senior developers. I create java templates, assist and provide tasks to junior developers.
- Worked closely with QA team

Technologies used: Struts 1, Advisen API, HTML, Javascript - JQuery and prototype.js, Oracle JDBC, Apache Tomcat, JBoss

Tools: CVS, Eclipse, Toad, Unix/Windows 7

Business Analyst 2

11/2010 - 02/2014

VERIFONE GLOBAL
DEVELOPMENT CENTER

Pasig City, Philippines

Responsibilities:

- Working remotely with our Manager in Atlanta, Georgia and IT Business.
- Maintain, design and develop a large J2EE application named Broadvision web application. Used Broadvision api, HTML, CSS, Javascript(JQuery, JQuery Mobile), JSP, JSTL, Struts 1, Spring, Spring rest/security, JDBC and Apache Cordova(Mobile Application).
- Assist in developing and fixing security vulnerability on all Broadvision web applications.
- Design and develop mobile applications single handedly. Used Apache Cordova, HTML5, CSS, Javascript(JQuery mobile) and SQLite. This is used by technicians to update cases for repair in the USA, Portugal and South Africa. This will also give the technicians location when updating records. It is capable of offline work so that the data will sync later when internet connection is available. Uses a camera as a barcode scanner. It is also able to capture signatures and upload files.
- Maintain, design and develop Integrations systems like SOA BPEL modules and web services using Axis2+EJB or Spring(MVC/Rest)+JDBC template.
- Used SVN as version control system
- Participate in discussions with Business Analyst and or with other teams with different systems like Amdocs and Oracle team
- Provide test plans. Perform Unit testing and regression testing on the application
- Provide deployment plan
- Provide support during and after deployment or in case there's issue during deployment
- Research JCraft(JSch) and develop standalone applications that can connect to other secured machines for file transfer.
- 24/7 Technical Support

Technologies used: Broadvision API, Struts 1, Spring(MVC/Restful), Spring JDBC Template, SOA BPEL, Web Service (Axis2), EJB, JSch, Oracle - JDBC & Stored procedure, HTML, CSS, Javascript - JQuery, Weblogic server, Apache Cordova - Android Tools: Apache Ant, Apache Maven, SVN, Eclipse, Toad, Unix/Windows 10

Senior Programmer

05/2009 - 11/2010

ST. LUKE'S MEDICAL CENTER

Quezon City, Philippines

Responsibilities:

- Design and developed Doctors Portal, Newarms Utility, ARMS Maintenance and HL7 Gateway Integration using Spring 3, Hibernate 3, JSP, JSTL, HTML, Javascript(JQuery) and CSS.

- Design and develop LIS error reporting tools using Spring 3, Hibernate 3, JSP, JSTL, HTML, Javascript(JQuery) and CSS. This will create a report on issues on the records that needs immediate action in the pathology department.
- Participate in discussions with Analysts and consultants
- Provide technical documents and Assist junior developers
- Provide deployment plan
- 24/7 technical support

Technologies used: Spring MVC - Appfuse based application, HTML, Javascript(JQuery), Hibernate, Spring JDBC Template, POI or IText for Excel & word, Crystal Report, Oracle JDBC, JMS

Tools: Eclipse, Toad, SVN

Freelance programmer

05/2008 - 02/2009

INNOVAGENCY SARL

Lausanne, Switzerland

Responsibilities:

- Remotely working with Senior developers in Switzerland
- Develop web applications silentsoft and 7d2, <http://macbidouille.com/>, metalreviews, petit-leo, jvastudio and swiss ibd cohort study. These are Typescript javascript based using EXT JS. I had to research EXT JS while doing the first project.
- These projects are developed using Struts 2 + Spring, Php(Joomla, Symfony), Javascript - EXT JS, MYSql and Apache Tomcat

Technologies used: Struts 2 + Spring, Php(Joomla, Symfony), Javascript - EXT JS, MYSql, Apache Tomcat **Tools:** CVS, Eclipse

Java Developer

11/2005 - 05/2008

ITPPL/JACM SERVICES
INC/Advisen

Davao City, Philippines

Responsibilities:

- Design, develop and maintain Advisen web applications(<https://www.advisen.com>) like Federal Dockets, Mscad, Loss Triangle, People(Beta) Expansion, Program Management 2, Easy Placement, Fpn, Advisen Community and Advanced Policy Comparison. Used HTML, CSS, Javascript(JQuery, Prototype.js), jsp, jstl, struts 1 and jdbc.
- Participate in discussions with our project lead(senior developer) and project manager
- Worked as team lead with 3 junior java developers and 2 other senior developers. I create java templates, assist and provide tasks to junior developers.
- Worked closely with QA team

Technologies used: Struts 1, Advisen API, HTML, Javascript - JQuery and prototype.js, Oracle JDBC, Apache Tomcat, JBoss

Tools: CVS, Eclipse, Toad, Unix/Windows 7

Freelance developer

06/2005 - 10/2005

STANFILCO TROPICAL FRESH -
A DIVISION OF DOLE

Davao City, Philippines

PHILIPPINES, INC.

Headquarter: Westlake Village, CA

Responsibilities:

- Develop and modify Leaves And Attendance System as we were the ones who created it in Dolefil. This is to cater multiple cannery sites
- Work closely with HR team and systems analyst
- Provide training across all locations in Mindanao area in the Philippines
- Provide deployment plan

Technologies used: Struts 1, Jakarta POI, HTML, Javascript, Websphere

Tools: WASAD, Eclipse, CVS

Freelance developer

04/2003 - 05/2005

DOLEFIL- A DIVISION OF DOLE
PHILIPPINES

General Santos City, Philippines

Headquarter: Westlake Village, CA

Responsibilities:

- Design and develop Leaves And Attendance System to cater multiple cannery sites. Uses servlets, Struts 1, Tiles, HTML, CSS, Javascript and JDBC.
- I was a junior developer selected to lead and provide templates on different tasks to other junior developers. I was selected to work in their cannery site.
-
- Work closely with project lead and QA Team.
- Provide deployment plan

Technologies used: Struts 1, Jakarta POI, HTML, Javascript, Websphere

Programmer Analyst 2

08/2000 - 02/2003

SOFTWARE STUDIO FOR
CONCEPTS, DEVELOPMENT
AND RESEARCH, CORP

Davao City, Philippines

Responsibilities:

- Design and developed web applications in a team as a Junior developer. These are Web Student Administration, Web Accounting And Inventory, Accounting And Inventory System, Web Furnimas Simulation For Rematch and Hospital Program.
- Visual Basic applications to applet Technologies used: Java, Swing, Applet, Sockets, Servlets, Tomcat, Sql Server, Gemplus Technology - Smart Card, MS Access, Visual Basic
